

Masi

**Tumbling
Tower**

**Made from
100% Up-Cycled
Plastic Waste**

PRODUCT DESCRIPTION

The Mãi Tumbling Tower is a timeless variation of the classic stacking brick game. Players take turns removing one block at a time from a tower constructed of 54 blocks. Each block removed is then placed on top of the tower, creating a progressively more unstable structure.

Mãi is made from 100% up-cycled plastic waste. Mãi, which means “forever” in Vietnamese, refers to the properties that make these plastic materials great—the Mãi will last forever—either in this form or reprocessed into something new. All products are designed and manufactured in HCMC by rice studios, PLASTICPeople, and family-owned furniture maker Minh Chương.

PRODUCT SPECIFICATIONS (STACKED)

Width	72 mm
Height	252 mm
Weight	1.3 kg of up-cycled plastic waste

COLLABORATORS & AFFILIATES

Designed by rice studios
Produced by Minh Chương
Material by PLASTICPeople
